

"MAN OF SILENCE" ONLY HOMESICK

After Trying Forty Languages
and Dialects Police Prisoner
Is Finally Induced to Talk.

"The man who can remain silent in twenty-five languages," as Magistrate Wahl described him, was arraigned today in Centre Street Police Court. He was found yesterday afternoon by Policeman Frank Williams, of the Oak street station, standing as if paralyzed in front of the Pulitzer Building. He stood almost motionless for a long time, apparently showing no interest in anything. The policeman finally told him to move along. The only reply was an empty, expressionless stare. Then Williams took him to the station-house. There trouble began. The prisoner couldn't understand English, and about everything else from Irish to Yiddish was tried without success. So the captain sent Williams with his prisoner to the Barge Office and Ellis Island. Here every language and dialect known to the official interpreters was tried, but only elicited occasional grunts and guttural sounds, meaning nothing to the questioners.

Forty Dialects Tried. The interpreters gave up in despair and advised Williams to take his charge to the Polish Mission at No. 117 Broad street, in the hope that some one might be found speaking a dialect he could understand. This failed, too, and the man was locked up in the Oak street station, after at least twenty-five persons had tried some forty dialects and languages on him in vain.

When he appeared in court today he was as mysterious as ever, and after two interpreters, several lawyers, and a dozen policemen and as many reporters had succeeded only in terrifying him, "Mike" (Mikolaj), official interpreter of the Court of Social Sessions, was sent for. He took the man out of the court-room and gave him a glass of water and a cigarette. He took both eagerly and his fears quieted, was able to reply in whispers to the questions put to him by the interpreter in a peculiar Russian-Polish dialect. It was slow work, but the interpreter drew out this history:

Robbed and Homesick. The man is a Russian Polek, twenty years old, although he says to be about seventeen. His name is Jan Pukowicz and he was born in Jukowicz, in the district of Lwow, Poland. He came to this country with two others, both of whom had some knowledge of English language, but who have disappeared presumably after finding employment. He came here from Bremen and went to Akron, O., to work in the mines. How he got back to New York he can not tell, but he was robbed of all he had, one mark and five pennies (about 20 cents). He said he wanted to go back to Russia and also said he had a bad earache, which made him deaf. It is expected the Polish Mission people will take charge of him.

THE CLOSING QUOTATIONS

To-day's highest, lowest and closing prices and net changes of stocks from Saturday's final quotations are as follows:
